

Are you a member of the Danish-Thai Chamber of Commerce?

Then you receive a significant discount on the first year EGN-membership and experience the power of a professional peer group network.

EGN Thailand started operations in Bangkok early 2017 as a franchise of EGN Group (Executives' Global Network).

Established in Denmark in 1992, EGN is today a global network of 14,000 members, representing more than 8,000 companies and 70 professions. A trusted, worldwide network of peers with a shared ambition of making each other better - every day.

Shared value via network partnerships

As part of our offer, we are partnering with the best organisations in Thailand that cater to similar executive profiles as our peer group members in order to create shared value and maximize benefits for both parties.

Our current offer is primarily targeted Senior Executives Leaders (CEO, COO, President, MD and GM) from Thailand's top 1000 companies, as well as Senior Executives within HR and Finance respectively. In 2018, we plan to expand our offer to count professional peer groups for executives within IT, Marketing, Sales and Business Development.

How the network works

From our 25 years of experience, we know that diversity is important, which is why our groups consist of different nationalities and industries. An EGN membership varies in price, depending on your locality, seniority and the specific benefits applied to the EGN group.

The annual membership fee (60,000 to 90,000 THB) includes 6 executive meetings with facilitator, speakers, refreshments and logistics as well as access to our online Members' Universe, an online community of 14,000 professionals worldwide, and features a global query function, in-app messaging, virtual EGN groups, a major e-book library with approx. 200 titles.

On top of our members-only peer group meeting, we do monthly events for both members and potential members. Worldwide, EGN hosts more than 5,000 meetings and events on an annual basis. You can find more information about EGN Thailand and what we do on our website: th.egn.com.
